LANA BIKE

ANODISED
ALUMINIUM
STRUCTURE

THE ULTRA LIGHT AQUABIKE

The **Lanabike** is the first aquabike in the Waterflex range to use **aluminium** instead of the usual stainless steel.

With this innovation, it can display a **featherweight of less than 10kg**, ideal to place it and remove it from the swimming pool,

whilst still ensuring great stability thanks to its large feet and silicone suction cups.

With possible multiple adjustments at feet level, saddle and handlebars, the **Lanabike** is suited to all swimming pools and water treatment, including salt treatment.

ADVANTAGES

- Lightweight (9.5kg)
- Made in Anodised Aluminium
- Choice of 3 colours
- Barefoot use
